## A Question of Food Values

Of course there is ice cream and ice cream, but when it's Robinson's Velvet it's good ice cream; it is the most nourishing of foods.

Weight for weight, it contains more nutriment than any other food. It's made of nutritious matter only when it's made right.

But that's not all—it is a highly digestible food—suitable for the child, the invalid, the aged.

It answers the natural craving of the child as no other food does.
